Index of Subjects

Age, dairy cattle, carotenoid, tocopherol levels, serum, 137

Bacteria, destruction, continuous heat treatment, temperature fluctuations, 251
Bacteriocins, production, *Streptococcus cremoris*, u.v. irradiation, 87
Blood, lipids, phospholipids, content, feeding concentrates containing fatty acids, 383, 393
serum, carotenoid, tocopherol levels, 137
Buffalo, rumen, microbial activities, cf. Zebu cattle, 1
Butter, quality from stored, chilled cream, 225

β-Carotene, carotenoids, content, cattle serum, 137
Casein, flavour stability, 203
stored, 'gluey' off-flavour, 215
sulphydryl, disulphide groups, 115
α_s-Casein, complex, fractionation, milk, 259
β-Casein, purification, 353
κ-Casein, action of calf rennet, other proteolytic enzymes, 11
purification, 353
Cheddar cheese, production, continuous curd-making, 53, 241
lactose, lactic acid, mineral equilibria, 93
Cheese, lipoproteins, histochemical identification, 125
Cheesemaking, aseptically, hydrolysis, fat, protein, 65
continuous curd-making, high-temperature, short-time scalding, separation from whey, 53, 241
lactose, lactic acid, mineral equilibria, 93
Coagulation, milk, heated, pH, milk salts, variation, 343
rennet hysteresis, 333
rennet, action, 183
bovine-, porcine-pepsin, comparison, 427
Concentrates, containing fatty acids, milk yield and composition, 369
plasma, lipids, phospholipids, milk fat-secretion, -composition, 375, 383, 393
Cream, chilled, stored, butter quality, 225
properties, processing variables, 269
viscosity, fat content, temperature, interrelationship, 417

Disease, *see* **Mastitis**

Enzymes, *see also* **Rennet**
mammary gland, hormonal control, 47
proteolytic, action on κ-casein, 11
quantitative estimation, micro-method, 21

Fatty acids, in concentrates, blood, lipids, phospholipids, content, 383, 393
milk fat yield and composition, 375, 383
milk yield and composition, 369
milk fat, seasonal differences, 103, 169
4,8,12-trimethyltridecanoic acid, identification, 77
synthesis, mammary gland (review), 145
Flavour, 'gluey', casein, stored, 215
land cress taint, milk, 37
Lepidium taint, butterfat, 31
stability, milk proteins, 203
Folate, protein bound, milk, 435
Fructose, metabolism, mammary gland, sheep, goat, 233

Glucose, catabolism, effects of acetate and pyruvate, mammary gland, rat, 455
sheep, 469
Goat, mammary gland, fructose metabolism, 233

Heat stability, *see* **Coagulation,** milk, heated
Heat treatment, milk, vitamin content after storage, 447
temperature fluctuations, bactericidal effectiveness, 251
Hormones, control, enzyme system, mammary gland, 47

Lactose, content, milk, feeding concentrates containing fatty acids, 369
winter, 399
synthesis, mammary gland (review), 145
Lipids, content, blood, feeding concentrates containing fatty acids, 383
synthesis, mammary gland (review), 145
Lipoproteins, cheese, histochemical identification, 125

Mammary gland, *see also* **Udder**
biochemistry (review), 145
enzyme system, hormonal control, 47
fructose metabolism, sheep, goat, 233
glucose catabolism, effects of acetate and pyruvate, rat, 455
sheep, 469
Mastitis, California mastitis test reaction, gel formation, 359
Milk, action of rennet, 183
coagulation, *see* **Coagulation**
land cress taint, identification, 37
nutritive value, after removal of fission products, 129
vitamin content, after heat treatment, storage, 447
Milk composition, feeding concentrates containing fatty acids, 369
salts and heat stability, 343
Milk fat, content, cream, temperature, viscosity, interrelationship, 417

Milk fat, content, milk, during milking, 177
fatty acids, butter, seasonal differences, 169
milk, feeding concentrates containing fatty acids, 369, 375, 383
seasonal differences, 103
4,8,12-trimethyltridecanoic acid, isolation, identification, 77
globules, size, number, single milking, 177
Lepidium taint, identification, 31
Milk fat yield, feeding concentrates containing fatty acids, 369, 375
Milk proteins, content, milk, feeding concentrates containing fatty acids, 369
winter, 399
flavour stability, 203
lipoproteins, cheese, histochemical identification, 125
Milk solids, *see* **Solids-not-fat**
Milk yield, feeding concentrates containing fatty acids, 369
non-nutritional factors (review), 479
Milking, fat globules, size, number, increase, 177
rate, milk ejection reflex, ewes, 191
udder infection, 279

Neuroendocrine ejection reflex, milking rate, ewes, 191
Nitrogen metabolism, rumen (review), 313
Nutritive value, milk, after removal of fission products, 129

Pepsin, bovine, porcine, milk-clotting, proteolytic activites, cf. rennet, 427
pH, milk, heat stability, 343
Phospholipids, content, blood, feeding concentrates containing fatty acids, 383, 393
Protein, synthesis, mammary gland (review), 145
Proteolysis, rennet, bovine-, porcine-pepsin, 427

Radioactive nuclides, removal from milk, pilot plant, 129
Rat, mammary gland, glucose catabolism, effects of acetate, pyruvate, 455
Rennet, action on, κ-casein, 11
whole milk, 183
hysteresis, heated milk, 333
milk-clotting, proteolytic activities, cf. bovine-, porcine-pepsin, 427
quantitative estimation, micro-method, 21
Rennin, properties, effects of protein modifying agents, 299
substrates, synthetic peptides, esters, 409
Rumen, microbial activities, Zebu cattle, buffaloes, 1
nitrogen metabolism (review), 313

Salts, milk and heat stability, 343
Season, milk fat, fatty acid composition, differences, 103, 169
winter, solids-not-fat, content, milk, 399
Sheep, mammary gland, fructose metabolism, 233
glucose metabolism, effects of acetate, pyruvate, 469
milk ejection reflex, milking rate, 191
Solids-not-fat, content, milk, feeding concentrates containing fatty acids, 369
winter, 399
Sterilization, temperature fluctuations, 251
UHT, milk, vitamin content after storage, 447
Storage, casein, 'gluey' off-flavour, 215
chilled cream, butter quality, 225
milk, UHT processed, vitamin content, 447
Streptococcus cremoris, u.v. irradiation, production, antibacterial agent, 87

Temperature, cream, fat content, viscosity, interrelationship, 417
α-Tocopherol, content, cattle serum, 137

Udder, *see also* **Mammary gland**
infection, impact of liquid on end of teat during milking, 279

Viscosity, cream, fat content, temperature, interrelationship, 417
Vitamins, *see also* **Folate**
content, milk, after heat treatment, storage, 447

Weed taints, dairy produce, 31, 37
Whey proteins, folate binding, milk, 435

Zebu cattle, rumen, microbial activities, cf. buffaloes, 1
